1. Our school's aim is to digitalize the whole classes using new advance technology to improve the learning level of the students in next three years so that they may cope up new technology and utilize these resources upto its optimum level. With the help of this advance technology and digital classes, we may have better output in the teaching learning process.

2. Our school's aim is to develop bicycle culture among the students and staff, so as to reduce carbon footprints and to create awareness among students about hazards of environmental pollution. To create green, clean and pollution free environment surrounding the school campus in forthcoming three years.
