

PROBLEM SOLVING SKILL

Two comic books have been prepared by CBSE and released.

One book explains what are critical thinking skills (Cogito) and the other explains what are problem solving skills (The question book)

Both comics are released as student resource material for PISA.

I highly recommend all states to reach these comics to all their students in classes 6 to 10, through the following links on **DIKSHA** or through pdf that I am attaching below. These 21st-century skills are essential for all our learners.

The question book

Problem solving is an important 21st Century Skill. CBSE has come up with a 'Question Book' delving on the process of problem solving and recognizing problem. 'Cogito' is another comic strip on 'Discover what it means to know' it is highly recommended for all teachers and learners to go through the e-comic strips prepared by CBSE.
